LEFKE MULCHING PILOT PROGRAM

DON'T BURN IT, MULCH IT!

What is Mulching?

Mulch is produced by a wood chipper that quickly and safely shreds woody plants, larger branches and tree limbs into smaller pieces that will decompose more quickly. Mulching provides a way to utilize trees, branches and limbs that would otherwise overwhelm the local landfill.

Why Should You Mulch?

Mulching is one of the easiest, cheapest and best ways to improve your garden.

Mulch

- ✓ Saves water – keeps more moisture in the soil
- ✓ Prevents weed growth
- ✓ Protects the soil from erosion
- ✓ Enriches and protects the soil and helps provide a better growing environment
- ✓ Insulates the soil so it maintains a more even soil temperature
- ✓ Provides a "finished" look to the garden

Why start a Mulching Program in Lefke?

SAVE is launching the Mulching Pilot Program in Lefke to provide a productive and environmentally-friendly way to dispose of the area's large amounts of trees, branches and shrubbery pruned from local orchards and gardens.

How Can You Benefit from the Lefke Mulching Pilot Program?

The wood chipper will be available to area residents with large amounts of garden and orchard trimmings simply by calling **728 7732** and/or **728 7358**. Mulching is free. Bags of free organic mulch will also be available to all residents of Lefke at the central municipal building.

Join us on Wednesday, November 7th at 15:00 to see a demonstration of the new chipper and get a free sample bag of mulch.

DON'T BURN IT, MULCH IT!

Call 728 7732 and/or 728 7358 to mulch your woody plants, larger branches and tree limbs
